(2013) for harp with or without electronics

to Milana Zaric

duration: approximately 4'40" (solo version) or 9-10 minutes (duo version with electronics)

The same score is used for the versions with and without electronics (see below)

from Karl Blossfeldt *Blattformen der Kunst* (1904)

both versions:

- (a) The lowest two strings are tuned to C# and D#, and the top string to G natural, throughout.
- (b) Trills, tremoli and grace notes always as fast as possible, all transitions as smooth as possible.
- (c)] = damp all sound, or, where indicated, damp selected sounds. This symbol is not used for sounds indicated as staccato. In general, staccato points indicate "étauflage", so that for example in bar 4, the first two notes in the left hand should sound through the damping of the third note. A "staccato-glissando" (as in bar 3) following the plucking finger, touching the strings lightly and damping them as soon as they are played.
- (d) A dotted slur (as in bar 1) indicates a pedal-legato in which the second note (with a small notehead in brackets) is not plucked.
- (e) Harmonics are notated using both the string to be plucked (with a diamond-shaped notehead) and the resultant pitch (small notehead in brackets), in other words.
- (f) In bars 41-45, extra staves are used for rhythmically-precise pedal activity - where two staves are used, the upper one is for the right foot and the lower for the natural and sharp positions of whichever pedal is specified.
- (g) Time signatures throughout are intended principally to indicate the duration of notes separated by pauses! in the musical interpretation. An additional rhythmical system (as is added to some bars in order to clarify their internal durations when the player's hands are rhythmically independent of one another.

duo version:

- (a) Both the harp and electronic parts contain both "fixed" and "free" material. The score of the solo version is used as the "fixed" element of the harp part in the duo recording of the solo version, reordered and transformed in pitch, time and timbre, in the form of a stereo soundfile which may be added to the entry for
- (b) In performance, the harpist alternates the "fixed" material with "free" material, ie. improvisation. At any moment the progress of playing through the score may be resulting "lacuna" occupied either by silence or by improvisation which might or might not be audibly related to the notated material on one or other side or both. If 1 and freely invented material by C, the lacunae might take the following forms:

- (i) A (silence) B
- (ii) A > B (transition between A and B)
- (iii) A C B (interpolation of unrelated material)
- (iv) A > C B (transition from A to new material, then returning abruptly to B)
- (v) A C > B (abrupt switch from A to C then transition to B)
- (vi) AaaaaB (using "looped" material from A to B)

... or any combination of these, or any other way of answering the "question" of what happens in the lacuna. (It might be supposed that it depends on the principles.) "Extended" techniques and/or auxiliary sound-sources which don't feature in the notated part may also be used, and the "free" material should of course also relate to (whether the latter consists of "free" or "fixed" material itself at that moment). Sometimes both parts will consist of fixed material, sometimes not. "free" material, sometimes one part will be "fixed" and the other "free", and so on. It is preferable for this not to be decided in advance of a performance, so that each performance can be different.

- (c) The electronics performer also alternates between "fixed" and "free" material in the same way, making "cuts" in the fixed material exactly as the harpist does in the recording.
- (d) The harp should be amplified over the same system as is used for the electronic sounds so that it is possible (if desired) for the two instruments to merge into one.
- (e) Each performer should think of giving approximately the same overall duration to the "free" material as to the "fixed" material (ie. the suggested 4'40" duration of 9-10 minutes. It may be found desirable for both performers to indicate when they have reached particular points in their respective "fixed" material so that one can follow the other).

This page contains four staves of musical notation for piano, spanning measures 13 through 17. The music is highly rhythmic and melodic, featuring complex patterns of eighth and sixteenth notes. Measure 13 starts with a dynamic of *mf* and includes performance instructions like 'rit...' and 'accel...'. Measures 14 and 15 continue with similar patterns, with measure 15 ending in *pp*. Measure 16 begins with a dynamic of *pp* and includes a note head instruction 'nat.'. Measures 17 and 18 conclude the page, with measure 17 ending in *fff* and measure 18 ending in *p*.

table

A musical score for piano, page 6, featuring two staves. The top staff uses a treble clef and the bottom staff uses a bass clef. Measure 28 starts with a dynamic *p*. Measure 29 begins with a dynamic *mf*, followed by *p*, *mp*, *mf*, *p*, *mf*, and *p*. Measure 30 starts with *ff*, followed by *fff*. Measure 31 starts with *pp*. Measure 32 starts with *mf*. Measure 33 starts with *p*, followed by *f*. Measure 34 starts with *ppp*. Measure 35 starts with *mf*, followed by *p* and *mf*. The score includes various time signatures: 3:2, 7:6, 9:11, 5:6, 4:3, 7:6, 11:12, and 5:6. Key changes are marked with *E*[#], *B*_b, *B*[#], *C*[#], *E*[#], *B*_b, *E*[#], *B*_b, *E*[#], *C*_b, and *D*_b.
