***catastrophe***

*(natural causes II)*

2017-18

horn & percussion

full score

# *catastrophe*

## *(natural causes II)*

(2017-18) for horn & percussion

Auftragswerk des Ensemble Musikfabrik  
to Christine Chapman and Dirk Rothbrust

duration: approximately 8 minutes

### Percussion instrumentation

2 suspended thai gongs  
2 plattenglocken  
2 suspended tuned glass bowls

23" (58cm) pedal timpano

1 rin

percussion mallets:  hard, medium and soft timpani mallets, medium vibraphone mallet, drumstick, metal triangle beater, rin beater, fingertips.

The mallets should be chosen to give the maximum diversity of timbre on all the instruments on which they are used.

### Notation

The score is written at transposed pitch. The horn sounds a fifth lower than notated. All trills and tremoli as fast as possible, all transitions as smooth as possible.

*Legato* phrase-marks in the horn part indicates that there should be no audible articulation between pitches. Horn valves are numbered F1-4 and Bb1-4 for the F or Bb divisions respectively. (4 = quartertone valve.) Often the number of the required partial is also given (fundamental = 1). Seventh, eleventh and thirteenth partials are notated as quartertone inflections – exact intonation should be inferred from the notation for valves and partials when present. When these are specified the implication is that subtle differences in intonation and/or articulation are being proposed.

Square noteheads indicate use of the voice, either alone (through the horn) or in unison or some other relation with the instrument. Distinctions are made in the score between four types of glissandi: (a) using half-valve technique, (b) using the voice (with particular valve combinations “forcing” the voice into a particular natural harmonic scale), (c) “glissandi” between harmonics of the given valve combination, (d) produced by a gradual transition towards half-stopping. It will be clear from the context which is intended.

] = damp all sound

### General notes

On 1 September 2013 I received a sequence of interconnected texts from Simon Howard, an English poet who over the previous eight years or so had become a close friend although we never actually met face to face. I had been interested for some time in working with his writing, which had (and still has) for me the quality of powerfully evoking possible sound-forms and a compulsion to realise them. I had asked Simon for a new text as a collaboration between us, suggesting only that it be structured around the number 16 (the number of instruments in the ensemble I had in mind), and indeed it consists of 16 short texts each divided into 16 lines or phrases. Simon had written in an email a few weeks previously: “Somehow I felt that entitling the work was what you’d like to do. I’ll let you have the full revised text next week & from there it’s material for your composition: I have no ‘control’ or sense of the words ‘belonging’ to me.” (He actually ended up giving the sequence the title *ADDICTION*.) Simon died suddenly in early December 2013 at the age of 53.

*Natural causes* is intended when complete to consist of sixteen compositions which can be performed in different interleaved combinations or complete in four “acts”. The first four to be completed, forming the third “act” with a total duration of 32 minutes (*pitch-black in sunlight* for 4 instruments, *loss’s glossolalia* for solo voice, *museum of found & lost sonic events* for 16 instruments, *not progressing from nowhere to nowhere* for improvising ensemble) were the result of a commission from Musikfabrik, while *catastrophe* belongs to the fourth. Not all of the components of *natural causes* involve an audible “setting” of the text. *Catastrophe* consists of four interleaved layers. The first is identical to the final section of *museum of found & lost sonic events*, the second and third are based on slowing that same section down by a factor of two and a factor of four respectively (although these factors are somewhat reduced by increases in tempo), and the fourth is based on a “translation” of the phonemes of the text into sounds for the horn and percussion.

Rag doll / kleptomania / blues & twos / all summer sex & leaden skies /  
allow me to instrumentalise / candidates will queue in orderly fashion / all winter alone &  
needle points glitter in the sky / stilt-walking is optional /  
the silence of a room over-flowering / catastrophe / snow whirl in the headlights / freezing  
fireflies /  
notes towards a theory of pornographic passacaglia / so sad she said / the badly burnt  
graffitist / eleven pints & threw up /

catastrophe (natural causes II)

Richard Barrett  
2017-18

musical score for "catastrophe (natural causes II)" featuring horn in F, gongs, b-plates, bowls, and timpani. The score is divided into systems, each with a measure number in a box (1, 5, 9, 12, 15) and a tempo marking of 48 or 84. The horn in F part includes dynamic markings (mp, p, mf, ff, ppp, pp) and various rhythmic patterns. The gongs, b-plates, and bowls part includes a note: "(slightly muted with a cloth throughout) as dry as possible except where otherwise indicated ] = damp sound with hand or 'dead stick'". The timpani part includes dynamic markings (mp, p, ff, pp) and various rhythmic patterns. The score includes complex rhythmic notation with ratios such as 3:2, 4:3, 7:5, 8:7, 7:8, 9:7, 5:6, 7:6, 6:5, 6:4, 5:4, and 3:2. The horn in F part also includes a "voice" section with a ratio of F234. The score concludes with a 4/8 time signature.
